8. Publication of Research Results

Overview

Makes provisions that shall govern the publication of research results.

Scope

Applies to all proposals and agreements for public and private support for research projects and sponsored research programs at UAEU.

Objective

The University maintains the right to make public the outcomes of its research activity. This Policy defines the terms and limits that give effect to that right.

Policy

Contracts with external sponsors will include the following provisions:

1. **University's Right to Publish:** The University reserves the right to publish the research results. However, the sponsor can request in writing at the start of the contract that sponsors will be provided an opportunity to review the manuscript and to make suggestions for modifications.
2. **Other Party's Right to Publish:** If the University decides not to publish the results of the research, the other party may, with the consent of the University, publish them. In such cases, the University shall be given an opportunity to review the manuscript, and it shall not be published until approved by the University in writing.
3. **Proper Credit:** Publication by either of the parties shall give proper credit to the other party for the cooperative character of the research.
4. **Brand and Trade Names:** No commercial brands or trade names shall appear in the publication of the results unless such appearance of the brand or trade name is essential in description of the research; nor shall the name of the University or its logo be used in any way for advertising purposes.
5. **Publicity:** If desired by the Sponsor, no publicity shall be given by either party concerning any of the results of the research prior to publication by either party, except with the written approval of the other party.
