

Realizing potential

In 2010, 100% of Mubadala Chartered Financial Analyst trainees passed level one of the prestigious exam. The world average was 34%.

Investing in you...

Working at the very heart of the Abu Dhabi economy, Mubadala is driving growth across a broad range of sectors; developing and managing a diverse portfolio of projects and initiatives to ensure a prosperous future for Abu Dhabi and its people.

At Mubadala, we recognize that this future is dependent upon the successful development of a new generation of business professionals, and remain committed to ensuring that each of our UAE nationals have access to those training and development programs that will ensure they become 'the leaders of tomorrow'.

Graduate training program:

Mubadala graduates participate in a personalized training program, that not only provides on the job training, but allows them to work alongside leading industry professionals to ensure a sophisticated knowledge-transfer.

The program is currently divided into CFA and non-CFA modules across a diverse range of disciplines, from Finance and Engineering to Communications and Human Resources.

CFA trainees undergo an initial 6 month training module with our in-house CFA instructor, before attending the National Graduate Development Program (NGDP). Upon completion of the on the job training, graduates will join Mubadala at Senior Analyst level.

Other non-CFA trainees undertake a series of on the job training courses over a period of 12 months; they also attend the NGDP with our CFA trainees.
