

# RESEARCH AS ART

Research related images by CMHS faculty

Science and art are two ways of viewing the world. In this exhibition we remove boundaries and let art and science, emotion and reason mix with each other.

The “Research as Art” exhibition lets us explore the beauty of medical images beyond the microscope and scientific publication.

Enjoy the display and vote for your favorite CMHS research related art piece.

The winning images and prizes for voting participants will be announced on April 25<sup>th</sup> at the Student Research Day.
