AED 1,680/-
(including VAT)

Overview

When market environments become increasingly turbulent, sustainable competitive advantage and performance are prioritized. Research demonstrates that only agile organizations and managers survive and thrive in such circumstances. Agile organizations continuously adapt and innovate and develop timely, effective and sustained responses to environmental change. Agile managers think agile, embrace change and are resilient.

Course Description and Main Objective

This course provides a comprehensive view on organizational agility. It covers all major areas of organizational agility, including understanding the foundations of an agile organization, developing agile personalities and mindsets, developing agile strategies and preparing execution plans. From this course, delegates will learn to assess their personal organizational agility potential, optimize their organizational teams and processes, and act resilient as they face environmental changes.

Learning Outcomes

After conclusion of the course, delegates will understand agile organizations, their foundations, practices and processes and examine themselves as agile managers. They will develop the skills fundamental to the agile managerial personality, develop and understand strategies to transform the organization to an agile organization, and implement agile strategies at their organizations.

Content

The course content is dealt within four modules:

Module 1: The Agile Organization:

The concept of organizational agility and its pillars and frameworks, processes, and practices, and putting, concepts into action.

Module 2: The Agile Manager and Agile Mindset (Think Agile): Understanding yourself as an agile manager, assessing your fear of failure, understanding rigid and agile behavioral tendencies and putting concepts into action, as well as developing your own agility.

Module 3: Strategizing for Organizational Agility (Be Agile): Developing an agility strategy and putting concepts into action.

Module 4: Implementing Organizational Agility (Do Agile): The META model of organizational agility implementation; CAMS - Composite Agile Method; Managing strategy execution; and putting concepts into action.
