Description:

Microsoft Power BI is a cloud-based business intelligence and analytics service that provides a full overview of your most critical data. In this Power BI workshop, participants will learn how to visually explore a diverse set of data through a free-form drag-and-drop canvas, a broad range of modern data visualization, and an easy-to-use report authoring experience.

Topics Covered:

Day 1: 1:00 pm - 5:00 pm, February 12th (Sunday)

- Introduction to Microsoft Power BI Platform
 - The introductory workshop is designed to explore the fundamentals of Power BI interactive reports and the web-based Power BI service.

Day 2: 1:00 pm - 5:00 pm, February 18th (Saturday)

- Learn Data Visualization using MS Power BI
 - This advanced module examines the Power BI features that are based in advanced analytics and visualization. Data visualization is one of the important parts of data analysis. Presenting the data in an understandable and visually appealing format is essential for managers to communicate better with.
