

Standard 4.1: Impact on P-12 Learning and Development.

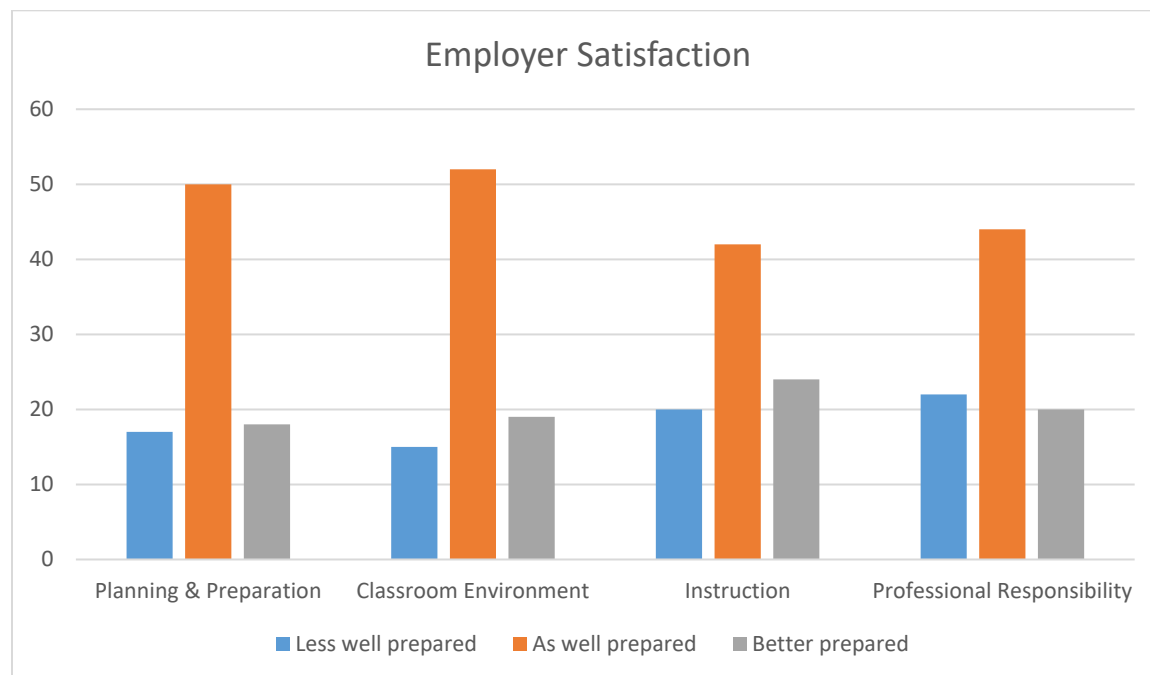

Data collection is ongoing.

Standard 4.2: Indicators of Teaching Effectiveness.

Data collection is ongoing.

Standard 4.3: Satisfaction of Employers.

Employers think that teachers who have completed training at UAEU are as good as or better than those who completed training in other institutions on: Planning and Preparation; Classroom Environment; Instruction; and Professional Responsibility.

Standard 4.4: Satisfaction of Completers.

This is what our completers say about their preparation at The College of Education, UAEU.

“Having been teaching now for a while, I can see how the College taught us well”.

“The UAE University has a great advantage in preparing me as a good teacher and when I finished I was ready to teach children through the educational objectives that I have benefited from. It is how to organize the class and the elements of the class environment course in addition to those trips to nurseries and kindergartens which we have benefitted from to show us how to deal with children smoothly. It truly helped me to become a good teacher”.

“I think the university of the Emirates is better at educating than other universities, this is because the university provided us with doctors and professors at high level to give students above their educational rights”.

“The courses that we took were of great benefit to us. They give us information which stays in our minds for a long time. As a teacher, I benefitted a lot from the doctors and the courses”.

“Doing the courses at the College taught us about lesson planning and activities. I think I am good at that now because of my education at UAEU”.
