Abstract

Through this research study, i tried to explain the nature of information system (first chapter made of 2 sections) the first section contains: electronic website definition/ electronic information system/ information network/ information technology methods/ the crime of illegal access to information system in its abstract, moral and material basis.

The second section includes the following: the crime of unauthorized access to information system to get any official government data or private confidential information related to financial, commercial or economic state/ the study of crime location and government data clarification/ financial, commercial and economic related data clarification/ the crime moral and material basis/ the study of the general criminal aim together with the personal criminal aim.

While the second chapter handles 3 sections related to sanction and action taken against violators. The first section includes: simple sanctions and intensive circumstances related to information system illegal access/ the crime of data, personal-impersonal information violation at work environment.

The second section includes: sanction and penalties taken against unauthorized information system access to get official government data or private confidential information related to a financial, commercial or economic state/ simple sanctions and intensive circumstances for penalties/ grading of penalty severity.

The third section include: actions planned to be taken against unauthorized access to information system/ the study of restricted freedom actions, rights deprived action and financial action stated legally in the (emirates federal decree number 5 for 2012 with its modifications). Finally I've been enlightened with the emirates sanction federal decree number 3 for 1987 with its modifications.

Keywords: Information System, Crime, punishments.
