Abstract

The Research addresses “The Legal Control over the Work of the Board of Directors (Board) of Public Joint Stock Companies (PJSC)” (Critical Analysis in light of UAE Law No. (2) of 2015 on Commercial Companies).

The Study explores in full the subject of the research. At first, it addresses the mechanism for the constitution of the PJSC's board and the legal system for the work of the board, including the mechanism for appointment and removal of the board through appointing the chairman of the board of the PJSC and the deputy chairman, the appointment of the managing director, and the conditions of appointment of directors and their removal. Then, the study proceeds to the analytical and critical evaluation of the constitution of the board of the PJSC.

The next section discusses the legal system for the work of the board of the PJSC. This includes the board competencies, responsibilities, term of office, remuneration and decision making.

As to the next section, it provides a critical analysis of the legal control over the work of the board of the public joint stock company, through the study and analysis of the internal control consisted in the general assembly's control and auditor's control; the apparent control which reflects the real control over the work of the PJSC board. The study also discusses the external control consisting in the managerial and judicial control.

The Thesis concludes with the main results, recommendations and references.

**Keywords:** legal control, legal system for the work of the board, PJSC board responsibility, managing director, conditions, economy, auditor, liabilities.
