Abstract

This study aims to reveal the effectiveness of using Rhythmic Chants in developing Arabic Sounds for Kindergarten Children. In addition, this study determining the level of children's pronunciation of Arabic Sounds and preparing skill's list in Arabic Sounds pronunciations for Kindergarten children. The Sample consisted of (50) children from AlDhafra Private Schools in Alain city during in the academic year 2019\2020. To achieve study aims, the researcher prepared a list of Arabic Sounds pronunciation skills, performance evaluation scale in pronouncing Sounds and educational program for Arabic Sounds.
The results were shown that there are statistically significant differences between experimental and control groups at the level (0.003) for the benefit for the experimental group, Which was studied by chants strategy. The results also showed an improvement in the sound performance of the children of the experimental sample after applying the program. Finally, it is recommend to pay attention to chants as curruiculim taught to children and choose the chants based on sounds.
