

DEAN'S MESSAGE

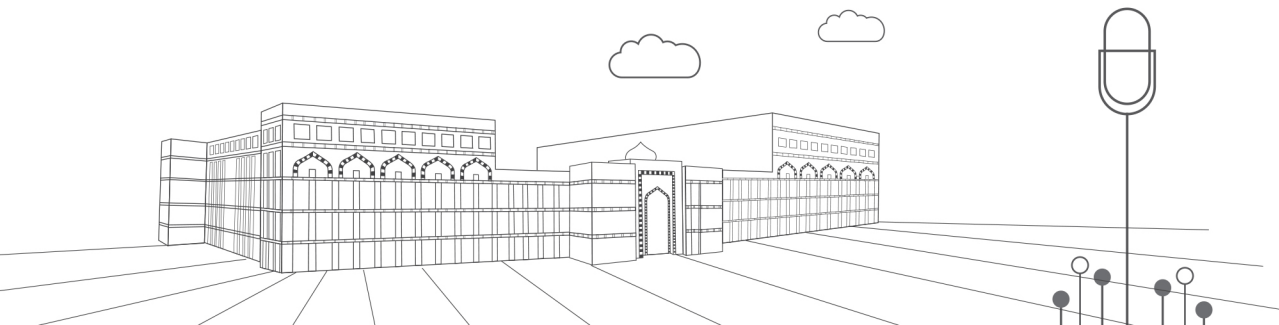

Welcome to the College of Medicine and Health Sciences (CMHS)

CMHS already has a pre-eminent reputation in the Middle East and wider Arab world. Over the last few years, it is also ranked in the top 1% of Medical and Health Sciences Colleges in the world. It is therefore my profound honour to be elected as the new Dean and Head of College.

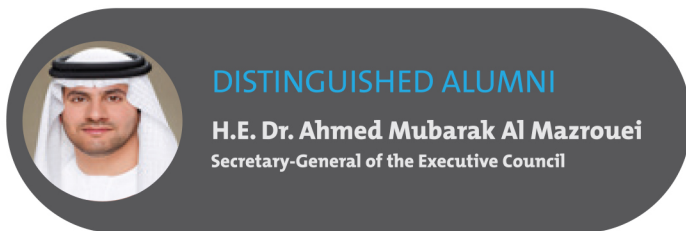

This is also a time of change, both within the College and without, as we welcome more Health Sciences staff and students to join those of Medicine. In addition, the Covid Pandemic has resulted in new ways of living, working and thinking. In this regard the founding fathers of UAE and UAEU have provided a clear strategic vision for us to work upon. Therefore, my aims are first to ensure the health and welfare of both staff and students, second to ensure we drive quality in all we do and third to deal with challenges that befall us creatively, for the benefit of the entire community.

Our Mantra is 'Tomorrow's Healthcare Today, for Everyone'

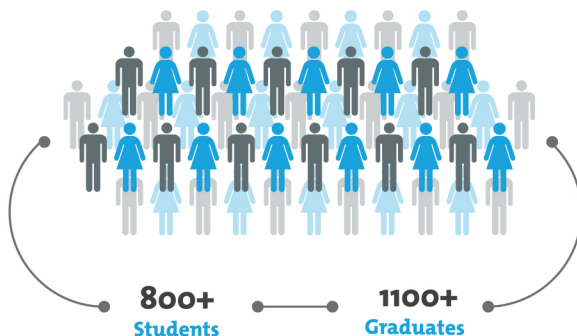

Prof. Janusz Jankowski
Dean and Head of College, CMHS
Honorary Clinical Professor, University College of London

STUDENT TESTIMONIALS

"The journey of medicine here is significantly enriched with support from faculty, administrators and students that are completely invested in each other's success. The college acknowledges and appreciates excellent academic performances, hence rewarding students with countless opportunities to pursue various training electives, both locally and abroad. I am confident and proud to say that having chosen CMHS as a platform to pursue my medical education was one of the best decisions I have made."

Abdulla Alshemeli,
Doctor of Medicine

"Our College of Medicine and Health Sciences fosters a student-centered culture that is guided by innovative education and advancing knowledge. Besides the great support we get from faculty, our curriculum is greatly reinforced by opportunities to apply our knowledge into simulated patient-interactions and clinical case studies. This certainly allows us to hone our skills, solidify our understanding of medicine, and makes us feel like the experience and learning is tailored to make us the best version of ourselves."

Husain Chaqfa,
Doctor of Medicine, Year 4
