

What Is Career Counseling?

It is the process of helping students choose the right major for them with an eye on a career that fits their abilities and interests. They are given advice on how to prepare for, advance and succeed at that career and achieve occupational adjustment.

Career Counseling Aims

1. Familiarize students with the available academic majors and their descriptions.
 2. Help students identify their interests and skills, and determine their personality type to choose the right major, and consequently their future career.
 3. Advise students who want to change their majors or colleges.
 4. Develop the skills of the students who are expected to graduate such as skills of resume writing, job interview, and job search.
 5. Familiarize students with career advising websites.
4. Use various modern techniques to help students determine their professional skills, interests and their personality types.
 5. Provide services such as:
 - Career Counseling
 - Individual Counseling Sessions
 - Group Counseling Sessions
 - Career Programs and Lectures
 - Career Training Workshops
 - Educational Process Support

Career Counselor Role

1. Help students identify their different skills and abilities, and guide them to choose the major and career that best fit those abilities.
2. Prepare students expected to graduate for the job market by developing their skills in writing resumes, preparing for job interviews, and job search.
3. Empower students to make independent and informed decisions on their career choice.

Target Groups

- Freshmen (first-year students)
- Current students
- Students expected to graduate
