Conditions Associated with the Minor Specialization

1. Interested students plan their minor in their 2nd year of studies with the help of department minor supervisor
2. Students register for the minor program in the 3rd year of their studies
3. Completion of the minor is noted on the students' printed transcript
4. Failure to complete a registered minor carries no penalty (e.g. the transcript does not refer to the minor at all)
5. Students cannot extend their undergraduate semesters just to complete the minor

The application should be submitted to the advising unit no later than November 1 for admissions to the minor program in the Spring semester OR April 1 for the Fall semester
