Think Green

Green Week event, with a theme of “THINK GREEN” is organized by Architectural engineering Students Society (male and female sections). The main aim is to increase the students’ awareness toward saving the environment and applying green strategies in their daily life. The event covers a Green Exhibition, student competitions, seminars, workshops, and guided field trips. Experts on green buildings and environmental studies will be presenting lectures, and conducting workshops. Participants from other GCC Universities will also take part in this event.

Vision

- Raise the community awareness of the importance to preserve the environment.
- Point out the advantages of using green strategies in our daily life.

Objectives

- To encourage students to use recyclable stuff as a choice of living.
- To increase the public awareness of greenhouse effects on the plant.
- To promote the University vision & mission in our society.
