e 365 Home is \$9.99 per month. You can cancel online at any time. ⓘ
e 2016 for Mac requires Mac OS X 10.10. Microsoft account required.

1. Chat for today's teams

Microsoft Teams provides a modern conversation experience for today's teams. Microsoft Teams supports not only persistent but also threaded chats to keep everyone engaged. Team conversations are, by default, visible to the entire team, but there is of course the ability for private discussions. Skype for business is deeply integrated, so teams can participate in voice and video conferences and everyone can add personality to their digital workspace with emoji, stickers, GIFs and custom memes to make it their own.

2. A hub for teamwork

Microsoft Teams brings together the full breadth and depth of Office 365 to provide a true hub for teamwork. Word, Excel, PowerPoint, SharePoint, OneNote, Planner, Power BI and Delve are all built into Microsoft Teams so users have all the information and tools they need at their fingertips. Backed by the Microsoft Graph, intelligent services are surfaced throughout the workspace to help with information relevancy, discovery and sharing. Microsoft Teams is also built on Office 365 Groups — our cross-application membership service that makes it easy for people to move naturally from one collaboration tool to another, preserve their sense of context and share with others.
