

# UAE Space Agency to launch Palm Seeds to the ISS on Monday

The UAE Space Agency will launch palm tree seeds to the International Space Station (ISS) on Monday, 22 July, 2019. The first of its kind study aims to discover the effects of the space environment on seeds and their agriculture potential beyond Earth. The UAE Space Agency is conducting this experiment in cooperation with the College of Food and Agriculture at United Arab Emirates University (UAEU) and NanoRacks.
