Leadership and excellence in higher education and scientific research at the regional and international levels.

UAE researchers identify flaws in fighting kidney disease

Researchers in the UAE have identified deficiencies in the diagnosis and treatment of a potentially fatal medical condition.

A study by scientists at the UAE University College of Medicine and Health Sciences in Al Ain found that some doctors were not checking patients who were at risk of chronic kidney disease (CKD) for signs of the condition, and were failing to use the most effective diagnostic methods.
