University's Vision

Leadership and excellence in higher education and scientific research at the regional and international levels.

UAE University students showcase green thumb

The United Arab Emirates University (UAEU) is probably the first of its kind to introduce organic farming to the younger generation turning the arid sandy soil into cultivable soil.

The Al Ain-based university, in doing so, imparts lessons in life, and the importance of giving back to the community, through a project that is taking students out of the classroom and into the garden.

University's Mission

Make a positive contribution to the advancement of United Arab Emirates by preparing graduates for future leadership, providing quality education that meets international standards, developing research solutions in areas strategic to the nation, and collaborating effectively with other organizations to promote knowledge in the society.
